SUBJECT: Technical Memorandum for Optimizing the BTEX LTM Program at SEAD-25 at Seneca Army Depot Activity in Romulus, NY; EPA Site ID# NY0213820830 and NY Site ID# 8-50-006

Dear Mr. Morse/Ms. Sweet/Mr. Sergott:

Please see the attached Technical Memorandum recommending an optimized long-term monitoring program for benzene, toluene, ethylbenzene, and xylene (BTEX) at the Fire Training and Demonstration Pad (SEAD-25) at Seneca Army Depot Activity in Romulus, New York. This memo recommends a ramp down strategy for monitoring wells for BTEX at SEAD-25. The recommendations do not impact the ongoing PFAS investigation at this site.

If you have any questions about the attached document, please call me at 347-271-0226.

Sincerely,

James T. Moore, PMP  
Acting Base Environmental Coordinator  
Corps of Engineers, Project Manager
